- Submit bookable hours by Thursday

  - What if there is more work to do on Fri?
  - Submit as late as possible, and if too late, just estimate instead

4 Client Requirements

- Requirements vs Wishlist Ask the client what is needed, vs what would be "nice"

  - Decided against a "wishlist" until Deliverable A is written

- Questions

  1. What is the desired API? How will he interface with the engine? Function Pointers, ...
  2. What values/parameters?

3. Special features - Multithreading, Async operation, ...

4. What output format?

5. Config for external functions? Do we init them, or do they init us?

6. Environment? What will this be used for?

7. Ease of Use, Generality, or speed? Should we assume types of input value / genenome.
